OAK REGENERATION WORKSHOP: *STRATEGIES FOR RANGELAND HEALTH AND CLIMATE CHANGE MITIGATION*

Discover the crucial role of oak tree regeneration in California's ecosystem with tips on sustaining oak woodlands through active restoration, passive restoration, and focused land-management practices. Learn how oak regeneration enhances ecosystem resilience and mitigates the effects of climate change.

Space is limited; please email Shana Risby (shana.risby@audubon.org) to register for the workshop. Lunch will be provided.

Workshop Highlights:

Scenic Location

Explore and hike the breathtaking natural landscape of Bobcat Ranch, which provides the perfect scenery for the future of oak trees.

Hands-On Practice

There will be an interactive demonstration on planting oak trees.

Expert Guidance

Learn from experienced nature experts who will share their tips and techniques.

11 APRIL 2024

10:00 AM – 2:00 PM
